Module

Module manufacturer: Module model:

Layout

North – South max length: East - West max length: ft m

Wind Loading

Wind Speed: mph m/s

Your building dept or local building authority should provide this.

Occupancy Category:

See definition below.

Wind Exposure:

Your building dept or local building authority may provide this. If not each level is defined below.

Topography:

Flat, hills, valley, mountain top, bodies of water nearby.

Please email any additional documentation or site layout drawings pertaining to this job to commercialsales@wattsun.com

Occupancy Category:

- 1 - Structures that represent a low hazard to human life in the event of failure.
Example: Agriculture facilities
- 2 – Structures except those listed in the other categories.
- 3 – Structures that represent a substantial hazard to human life in the event of failure.
Examples: Where more than 300 people congregate, daycare facilities, colleges, health care facilities
- 4 – Structures designated as essential facilities.
Examples: Hospitals, emergency vehicle garages, emergency shelters.

Wind Exposure:

B - 1,500 ft of urban and suburban areas, wooded areas, or other terrain with numerous closely spaced obstructions having the size of single-family dwellings or larger.

C - Open terrain with scattered obstructions having heights generally less than 30 ft. Flat open country, grasslands and all water surfaces in hurricane prone regions.

D - 5,000 ft of flat unobstructed areas and water surfaces outside hurricane prone regions. Smooth mud flats, salt flats and unbroken ice.
